WELCOME TO EUREKA HACKS 2025!

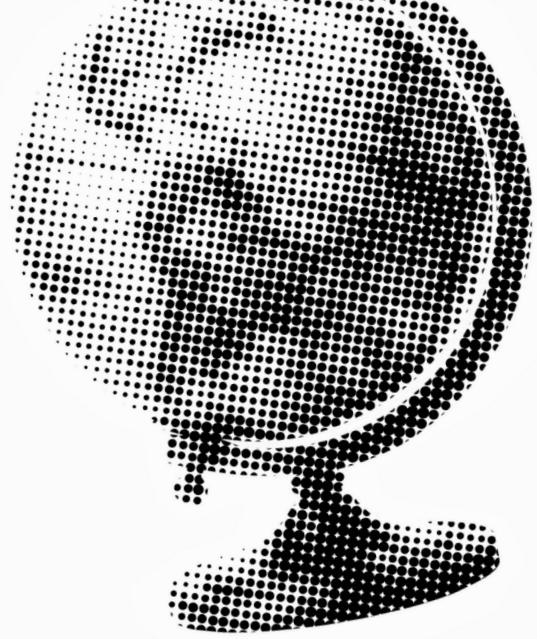

We are excited to have you at our **third iteration** of EurekaHACKS! This package contains important **information** that you need to know?

With a **packed schedule** full of fun activities, challenging tournaments, and insightful workshops - remember to take a break from the hacking and check these out!

We hope today is **full of Eureka moments** for you. Good Luck!

ABBEY 101

First Floor

Foyer, Theatre, Cafeteria, Gym

Second Floor

Library, Activity room (#220), Judging rooms

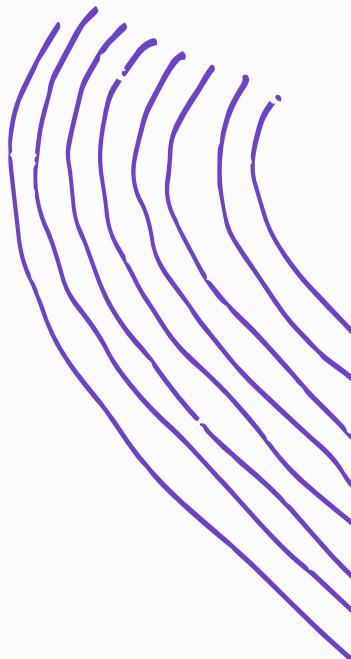

Hacking Spaces

Library, Cafeteria, Gym, Activity Room (#220)

Water Fountains

3 on First Floor

2 on Second Floor

NOTE

- There are 4 bathrooms (girls and boys) on every floor.
- If your team wants to work in a separate hacking space, approach an exec!
- If you have any questions or don't know where to go, find an exec! Our team (with yellow shirts) has the nicest people you will ever meet, not sarcasm 😊.

an AI B2B SAAS in High School
valued at \$7.5 million**

20:00 - 20:30

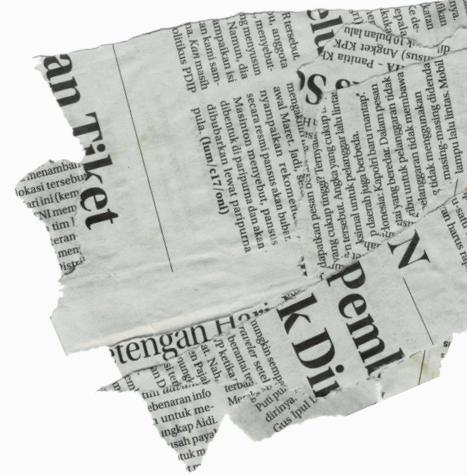

Library

Resume Roast

20:45 - 21:15

Theatre

Closing Ceremony

PANELS

From Prototype to Product

11:00 - 11:45 | *Theatre*

Want to learn about potential pathways post secondary? Join us for a chat with Christopher Anand (Associate Professor at McMaster) and Christopher Venantius (Angel Investor at GTAN & Entrepreneurship Coach at McMaster). They'll share insights on turning ideas into reality—whether in research or startups. Bring your business ideas, be ready for hands-on activities, and to talk about innovation!

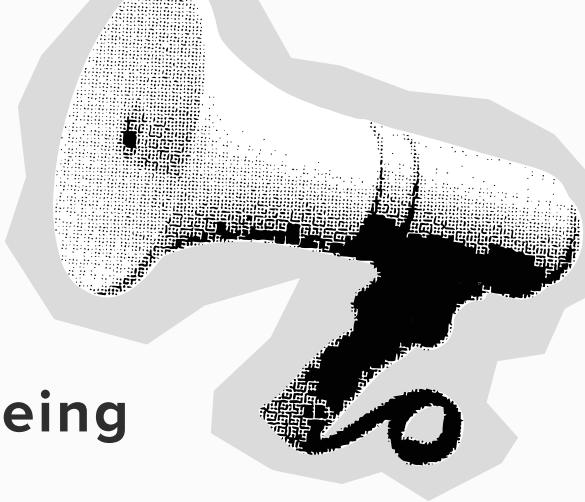

Fireside Chat and Q&A with Nicholas Tao

12:30 - 13:15 | *Theatre*

A unique opportunity to meet Nicholas Tao - known for having 150k+ subs on his Youtube channel and regularly receiving millions of views on his videos - he's a UW CS student who's had 7+ internships.

PANELS

How to be a Normal Human Being

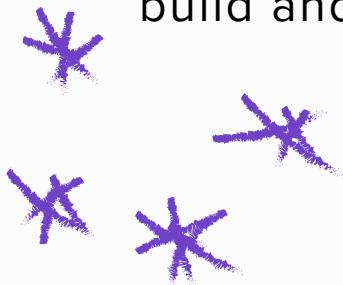

14:00 - 14:45 | Library

Victor, a Waterloo CS fourth year student, talks about everything you need to know about life in tech- nothing about coding, leetcode, or interviews, just life in general (a guide to sunshine, sleep, showers and socializing).

Factful – Lessons from Building an AI B2B SaaS in High School Valued at \$7.5 million

19:45 - 20:00 | Library

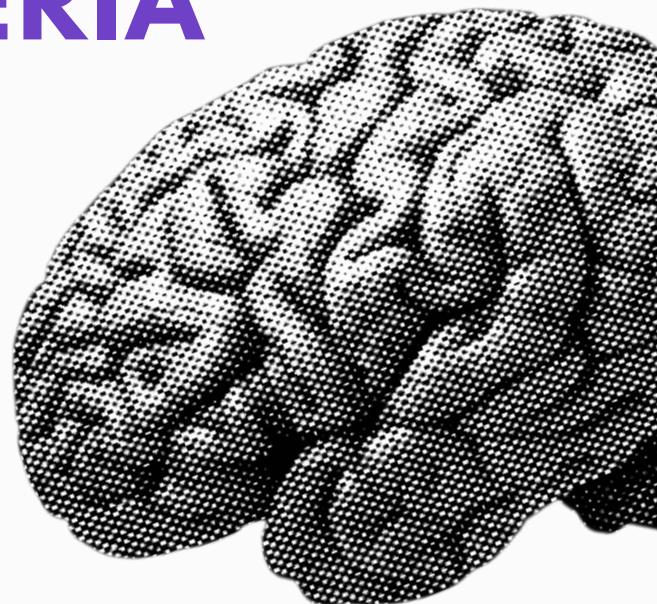

Moiz Hashmi's talk chronicles his and his friends' journey of building an AI B2B SaaS startup, Factful, during high school. His lessons learned include the importance of moving fast vs. being correct, the power of a good story, and that distribution may matter more than the product itself. Ultimately, it provides a great insider, behind-the-scenes look at what it takes to build and grow a startup from the ground up!

JUDGING CRITERIA

PROJECTS RATED ON :

25% CREATIVITY

25% TECHNICAL COMPLEXITY

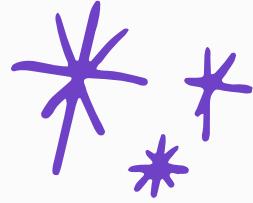

25% PITCH

25% IMPACT

PROJECT SUBMISSION

We have partnered with DoraHacks this year for our project submission.

To get started, head to dorahacks.com and sign-up. Then head to the EurekaHacks page (this will be released the day-off) and register as a hacker.

Use the Submit BUIDL section to submit your project as a team. Follow the instructions and you will be done. Yay!

PRIZES

Be ready to compete for a prize pool of **\$11,000+!** This year, you have a chance to win **Bambu Lab A1 Minis** for the best overall hack prize.

We have also partnered with **ICP and Vectara**, for custom prize tracks through the use of their APIs. Teams that go for the Vectara prize track will also be eligible for the **standard prize tracks**. There will be a mandatory ICP meeting right after opening ceremony which will provide more info about the prize track.

SPONSOR TRACKS

1. Best use of Vectara

- Vectara API - \$500 credits

2. ICP (starts during EurekaHACKS and goes for one week):

- 1st place: \$500 of ICP Tokens
- 2nd place: \$300 of ICP Tokens

PRIZES

STANDARD TRACKS

1. Best Overall Hack

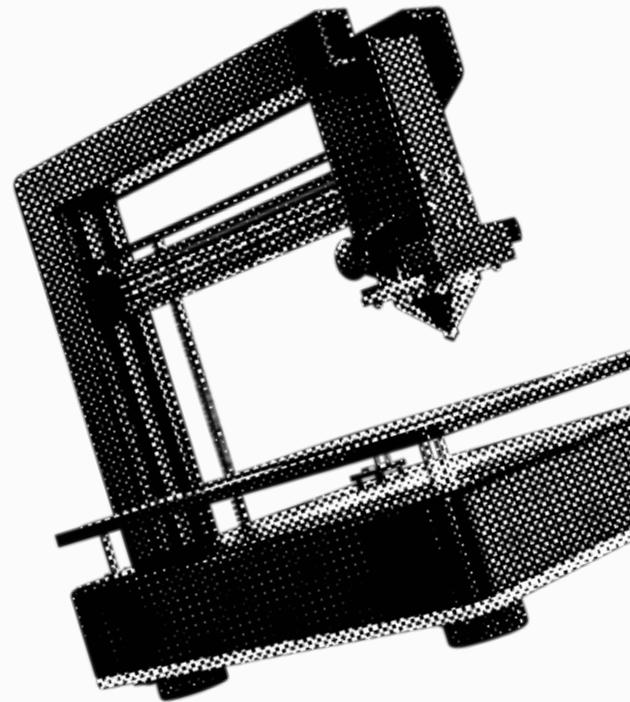

- Bambu Lab A1 Mini
- Interview Cake access license
- Beeceptor \$240 one-year plans

2. Runner's Up Hack
